

WONG JIA KAI

Singapore, Central | [+65 9272 1939](tel:+6592721939) | Wongjiakai@gmail.com | [LinkedIn](#) | [Portfolio](#)

SUMMARY

Cybersecurity graduate from the University of Wollongong with experience in vulnerability assessment, network security, and web application testing. Background in software testing at UOB and Pactera, with skills in Linux, Python, SQL, and a growing focus on threat detection and incident response through TryHackMe's SOC Level 1 path. Seeking a SOC L1 role to apply analytical thinking to security monitoring and threat detection.

EDUCATION

University of Wollongong, SIM

Graduated: June 2026

Major in Cybersecurity

PROJECTS & CYBERSECURITY HOME LABS

IntruSight – Web-Based Intrusion Detection System Dashboard (Final Year Project)

- Collaborated with a team to develop a full-stack IDS dashboard using React, FastAPI, and MongoDB, integrating Suricata, Snort, Zeek, and Kismet.
- Developed security monitoring and alert management features, centralizing alerts from multiple IDS sources.

WORK EXPERIENCE

United Overseas Bank (UOB)

June 2022 – June 2023

Software Analyst

- Investigated and triaged application defects using JIRA, prioritizing issues by severity/impact
- Conducted root cause analysis and validated remediation steps in collaboration with cross-functional teams, mirroring incident investigation and resolution processes
- Performed rigorous testing and validation to proactively prevent production issues, demonstrating a proactive detection mindset
Produced defect trend reports and stakeholder updates, translating technical findings into clear, actionable summaries

Pactera

September 2019 – January 2020

Software / Hardware Tester

- Identified, documented, and tracked defects through resolution across software and hardware systems, comparable to vulnerability/incident tracking
- Performed root cause and issue investigation, then validated corrective measures
- Collaborated with technical and operational teams to resolve reported issues under time pressure
- Authored technical documentation and test reports to support stakeholder decision-making

Singapore Armed Force, Infantry Training Institute (ITI)

February 2021 – May 2022

Assistant Platoon Trainer

- Led and supervised training activities for platoon-sized groups, developing skills in team coordination, delegation, and performance accountability under pressure
- Enforced strict adherence to safety protocols and standard operating procedures, reinforcing a disciplined, process-driven approach to risk management

TRAINING AND CERTIFICATIONS

Google Cyber Security Certificate: Includes Linux, MySQL, and Python hands-on labs.

CompTIA Security+ (In Progress)

TECHNICAL SKILLS

- Programming: Python, Java, SQL
- Security: IDS, Network Security, Vulnerability Assessment, Wireshark, Nmap, Suricata, Snort, Zeek
- Testing: UAT Testing, Defect Tracking, JIRA
- Tools: Git, Microsoft Office
